Portfolio · LinkedIn · GitHub · Toptal Verified Expert in Engineering

Summary

AI architect and full-stack engineer with 10+ years in software and 2.5+ years designing production multi-agent AI systems on Google Cloud and Azure. I own the whole system: agent orchestration (LangGraph, Google ADK), RAG, guardrails and evaluation, Python/FastAPI backends, React frontends, and cloud deployment. Toptal Verified Expert in Engineering.

- **60% of manual claim checks automated** and processing cut from **4 hours to 45 minutes** at **92% precision**, with an agentic insurance claims platform.
- **Days of quarterly reporting turned on-demand** with a Gemini/Vertex AI multi-agent platform that writes executive QBR decks and emails them to leadership.
- **8 years of enterprise engineering** for Standard Chartered, Deutsche Bank and British Telecom, on platforms used in 40+ countries by up to 2M+ customers.

Core skills

Area	Skills
Agentic AI	LangGraph, Google ADK, LangChain, multi-agent orchestration, tool calling, MCP, human-in-the-loop
LLMs & RAG	Gemini, OpenAI (GPT-4o), Claude, RAG, vector search (pgvector), prompt design, evaluation, guardrails
Data & BI	Conversational BI, BI modernization, PostgreSQL, Supabase, Databricks, Redis
Cloud	Google Cloud (Vertex AI, Cloud Run, Cloud Storage), Azure AI Foundry, Docker, GitHub Actions CI/CD
Backend	Python, FastAPI, Node.js, REST APIs, OAuth 2.0, multi-tenant integrations (Xero)

Area	Skills
Frontend	React, Next.js, Redux, TypeScript, Tailwind CSS, MUI, streaming chat UIs, WCAG 2.1 AA
Leadership	Solution architecture, pre-sales and solution offerings, sales enablement, technical leadership, mentoring

Experience

Agentic AI Architect & Full-Stack AI Engineer — HCLTech

Mar 2024 – Present

- **Augmented Insights (Nov 2026 – present):** modernizing enterprise BI platforms with AI and building conversational BI, so business users query their data in plain English. Shaping AI solution offerings into client-ready pitches and training sales teams to sell them.
- **Sales QBR platform (Aug – Oct 2026):** architected an end-to-end multi-agent platform on Gemini and Vertex AI. Synthesis, Analysis and Content agents answer business questions, generate executive QBR slides and email them to leadership on a schedule, with human review before sending.
- **Insurance claims AI (Feb – Jul 2026):** built LangGraph agents for verification, fraud detection and escalation. Automated 60% of manual checks and cut processing from 4 hours to 45 minutes, with 92% precision in UAT and zero security audit findings (JWT, RBAC).
- **Intelligent Regulatory Platform (Apr 2024 – Jan 2026):** led React architecture and delivered GenAI features on Azure AI Foundry for a life-sciences regulatory platform handling 500K+ submissions a year. Reusable components adopted across 4 modules sped up feature delivery by about 30%.
- Mentored 4 engineers; review standards cut critical bug escapes by 40%.

Technical Lead — HCLTech (client: Standard Chartered Bank)

Feb 2022 – Mar 2024

- Led frontend architecture for a global banking platform used by 3,000+ internal users across 40+ countries (React, Redux).
- Built a multilingual component system for 12 languages, cutting per-locale integration effort by 65%; reused across 3 projects.

- Raised Lighthouse performance from 61 to 89 and cut page-load time by 35% with lazy loading, code splitting and memoization.
- Implemented authentication, role-based access control and secure API integrations for banking workflows.

ERP Integration Specialist — AIgencyIQ (US startup, contract)

Aug – Oct 2026

- Built a Xero ERP connector for the ServiceOps Pulse platform: OAuth 2.0 and multi-tenant services, data sync and transform services, API routes, Supabase migrations and a React test UI, delivered in three sprints.

Freelance Full-Stack AI Engineer — Bessemer Venture Partners (contract)

Dec 2025 – May 2026

- Built an AI-assisted activity reporting and portfolio management platform: portfolio KPI dashboards, financing rounds, partner reporting and AI KPI extraction (React, Node.js, PostgreSQL, Databricks, Claude, Okta).
- Built React screens for the operations team to manage and track day-to-day activities.

Software Developer — Tata Consultancy Services

Jul 2016 – Feb 2022 · Clients: Deutsche Bank, British Telecom, McDermott

- Built React/Redux trading dashboards for Deutsche Bank processing 10,000+ trades a day; cut render latency by 40% and data load time by 25%.
- Developed a self-service portal for British Telecom serving 2M+ customers, WCAG 2.1 AA compliant, rated 4.2/5 after launch.
- Integrated Node.js APIs handling 500K+ monthly sessions at under 200 ms average response time.
- Delivered engineering dashboards for McDermott across 15+ countries, cutting bounce rate by 18% on low-bandwidth networks.

Selected AI products

- **Vantage, AI board deck intelligence** (live demo): an 8-agent pipeline turns a startup's board deck PDF into a decision-ready review, extracting 20+ financial fields, validating them, scoring six risk dimensions and recommending approve, flag or escalate.

- **AskDesk, enterprise AI helpdesk** (live demo): a Google ADK router agent hands requests to knowledge (RAG), action and escalation agents, streaming answers to a React UI with a live agent trace; FastAPI on Cloud Run.
- **AutoCloser, real-estate lead qualification agent**: an LLM agent qualifies buyers in conversation, updates an explainable 0–100 lead score, suggests matching listings and offers inspection slots, with human takeover at any time.

Education and certifications

- Toptal Verified Expert in Engineering — Toptal, 2026
- Build with Gemini, Track 2: Platform IT Developer — Google Cloud, Oct 2026 (credential)
- B.Tech, Electrical Engineering — Orissa Engineering College, Bhubaneswar, 2016
- React and CSS certifications — HackerRank, 2025
